Argentina:
- Precision plantation silviculture of pines and eucalyptus
- Growth and yield models for pines

Australia:
- Sustainable forest management
- Forest genetics and tree improvement

Austria:
- Exchange program with the Salzburg University of Applied Sciences, where faculty teach strategic management in the forest products industry

Bangladesh:
- Green aquaculture practices training

Brazil:
- Impacts of hydroelectric development on riverine fisheries and restoration of native riverine fish
- Precision plantation silviculture of pines and eucalyptus
- Growth and yield models for pines
- Study abroad options in Brazil on forestry and natural resource management

Bhutan:
- Work with the Ugyen-Wangchuck Institute for Conservation and Environment (UWICE) to build capacity for wildlife studies in rugged mountainous terrain

Bolivia:
- Wildlife disease ecology and connections to human communities

Bolivia:
- Precision plantation silviculture of pines and eucalyptus
- Study abroad to enhance students’ abilities to “read” landscapes, understand regions, and become aware of communities

Canada:
- Risk assessment of genetically engineered salmon
- Study abroad to introduce students to the physical and human landscapes of western Canada
- Study abroad to enhance students’ abilities to “read” landscapes, understand regions, and become aware of communities

Chile:
- Precision plantation silviculture of pines and eucalyptus
- Formal collaboration with newly established Center at Universidad Austral de Chile
- Cooperative research on reforestation of mined land with Pontificia Universidad Católica de Chile
- College-level participation in the Center for Science and Global Sustainability with the Universidad Austral de Chile

China:
- Impacts of the Three Gorges Dam on freshwater of the Yangtze River
- Service learning and interdisciplinarity study abroad focused on sustaining natural resources and cultural heritage

Colombia:
- Precision plantation silviculture of pines and eucalyptus

Costa Rica:
- Study abroad course in global issues on sustainability
- Precision plantation silviculture of pines and eucalyptus

Dominican Republic:
- Monitoring anti-aircraft pollution incidents and developing management practices to alleviate such dangers in Puerto Cabezas
- Study abroad program on sustainable management of water resources
- Study abroad program on land use change and urban growth in a Dominican shorthand
- Food import dependency and the food retail hierarchy

Ecuador:
- Relationships between national parks and neighboring residents

France:
- Sustainable marine livelivelihood research in education

Germany:
- Student exchanges with the University of Hamburg
- Student exchanges with the Friedrich Schiller University of Jena
- Faculty Scholar in Excellence at Georg-August University in Göttingen
- Synthesis of regiocontrolled derivatives of polysaccharides from biomass

Ghana:
- Characterizing pond aquaculture effluents and receiving stream water quality for environmental-management
- Substitution of bamboo by forest products mills to slow tropical forest deforestation

Haiti:
- Using bamboo composites for housing construction

India:
- Sustainable aquaculture training and education programming
- Service learning and interdisciplinary study abroad focused on sustaining natural resources and cultural heritage
